

The Coalition Against Global Genocide (CoAGG) has spoken in support of Ukraine since the beginning of this full-scale invasion by the Russians 2 years ago. CoAGG calls for the right of the Ukrainians to live a full, unencumbered and safe life within their own country, without fear of violence or retribution. While the U.S. has welcomed Ukrainians into our country, we ask the U.S. government to provide military and humanitarian aid to support the Ukrainian people in their homeland. We know that these acts of genocide and crimes against the Ukrainians have been ongoing for years. We will stand with Ukraine and their people, and we will continue to provide our support to everyone who stands up against the atrocities of genocide and crimes against humanity, and the harm it brings people both in Ukraine, and across the world.
